Toyota Bulletins | Georgia Collision Industry Association

I set mine up so no ign wire is needed like this but you are using a solar version so you would use a relay like this you are only connecting the BLUE wire to the ign which is a low load trigger wire to tell the redarc to run in a voltage sensing mode, in short the redarc will charge if the voltage on the red wire is higher than 13v or so.

URGENT HELP needed wiring in Redarc dc charger

Hi, I have a d22 navara dualcab and was wondering what size wire i would need to run from the isolator to the battery in the rear without losing current.
