### QO and Homeline Load Centers and Enclosures

Circuit Breaker Panel Box Wiring Diagram. This diagram illustrates some of the most common circuits found in a typical 200 amp circuit breaker service panel box. The breakers are installed in a panel so that contact is made with one of two hot bus bars running down the middle of the box. The hot wire for a branch circuit is connected to the breaker by a set screw on the base. The neutral and ...

### Circuit Breaker Wiring Diagrams - Do-it-yourself-help.com

Inside the covering, you'll find a copper wire (the ground wire), a white covered wire (the neutral wire), a black wire (the hot wire), and a red wire (another hot wire). In the sub-panel box, the neutral and ground wires will connect the same as they do in the main breaker box, but the red and black wires will connect to the hot bar instead of a circuit breaker.
