As you can see in the diagram above, the highest point of the bell curve on the X axis is equal to a score of 10 push-ups. You recall that more children completed 10 push-ups than any other number.

Measuring Progress - Tests and Measurements for the Parent

A number of authors have investigated the impact of early childhood education and care programs on the development of children. Often they have focused on the effects on children from socio-economically disadvantaged families.

How does early childhood care and education affect

A facility should identify and engage/partner with a child care health consultant (CCHC) who is a licensed health professional with education and experience in child and community health and child care and preferably specialized training in child care health consultation.
